Courses

## **Summary** \_

I have 2.8+ years experience in Data Science. Currently, I am working with Mindstix Software Labs as Data Scientist & Computer Vision Researcher. At Mindstix I am working on Recommendation, ChatBot & Computer Vision Systems.

Prior to Mindstix, I was working with Coriolis Technologies Pvt Ltd for 2 years as Machine Learning Engineer.

### Education

### **Diploma in Big Data Analyatics**

Aug 2015 - Feb. 2016 • Mathematics for Machine Learning: Multivariate Calculus by Imperial CDAC-ACTS PUNE

• Achived grade A with 70.00%

#### BE in Electronics & Telecommunication

University Of Pune

• Achived Distinction with 69.33%

### **Diploma in Electronics &** Communication

MSBTE, MUMBAI

• Achived Distinction with 85.38%

## Pune, India

Pune, India

Aug. 2011 - May. 2014

#### **Machine Learning Section** Mumbai, India

May. 2008 - Aug. 2011

Mindstix Software Labs Project

**Product Learning ChatBot** TENSORFLOW, DEEP LEARNING, PYTHON

**Facial Key Point Detection** 

TENSORFLOW, KERAS, PYTHON

• Nearest Neighbor Collaborative Filtering on Coursera • Matrix Factorization and Advanced Techniques on Coursera • Introduction to Recommender Systems: Non-Personalized and

• Recommender Systems: Evaluation and Metrics on Coursera

· answer is fetched in real-time from database

## Work Experience & Responsibility \_\_\_

## **Mindstix Software Labs**

Pune, India

Feb. 2018 - PRESENT · Recommendation Systems for Retail Business

- ChatBot Framework
- Face Recognition Systems
- Algorithm Design

DATA SCIENTIST

• Computer Vision Systems

## **Coriolis Technologies Pvt** Ltd

Pune, India

MEMBER OF TECHNICAL STAFF

Mar. 2016 - Feb. 2018

- Developer & Scrum Master for Cloud Team
- Rails Backend Development for Orchestration tool
- Development of Ansible, Chef and Puppet configuration managers
- License Plate Recognition, Face Recognition

## Skills & Courses \_\_\_

**Tools** Git, LaTeX

Stacks MongoDB, MySQL, Neo4J Languages C, Python, Java, Go, R

Frameworks Ruby On Rails Web Technologies

**Machine Learning** Tensorflow, Keras, Pytorch, OpenAl

## **Chatbot Framework**

Mindstix Software Labs Project

Open Source Contribution

NLP, LSTM, RASA, PYTHON, FLASK

• This is Deep Learning based Chatbot used by customer in production

• Trained Various models Using Keras & Tensorflow, with multiple op-

• End to End integation of bot with with REST API's

#### **Neural Style Transfer App**

Open Source Contribution

CNN, Python, Kivy

timizers.

- This app is a TensorFlow implementation of the paper A Neural Algorithm of Artistic Style by Leon A. Gatys, Alexander S. Ecker, and Matthias Bethge.
- The paper presents an algorithm for combining the content of one image with the style of another image using convolutional neural network.

#### **Prodcutivity ChatBot**

Open Source Contribution

NLU, FLASK, SLACK

- Track How much time spend on which task, based on given input this bot extracts intent & slots using NLU
- Once itent & entity predicted, then detected task is added into DB

ISHWAR SAWALE · RÉSUMÉ **DECEMBER 22, 2018** 

## User-User Collaborative Filtering

Mindstix Software Labs Project

NEO4J, PYTHON

- Personalized recommender algorithm which learn from past agreements to predict future agreements
- It uses the concept of similarity in order to identify users
- Instead of traditional approach of matrix factorization, Graph database is used

### User-Item Content Based Filtering

Mindstix Software Labs Project

TENSORFLOW, PYTHON

- Singular Value Decomposition (SVD) is used to estimate the size of the basket that we want to predict
- In the second step, we will predict n products which we believe that user will buy in his next order
- TensorFlow based implementaion of SVD

#### **Face Recognition System**

Mindstix Software Labs Project

FACENET, DLIB, SVM, KNN, PYTHON

- · From Facenet and Dlib face embedding extracted
- Based on obtained embedding three diffrent classification models are trained
- To tackle uknown person problem and increase accuracy, these three models stacked together

#### **Face Recognition Library**

Open Source Contribution

FACENET, PYTHON

- Face Recognition working with one API call
- · Based on Facenet, available as pip package

## License Plate Recognition System

Coriolis Tech Project

OPENCV, DEEP LEARNING, PYTHON

- This project was used to auto-detect License Plate in car and fetch license number
- I have used OpenAlpr library along with handcrafting features for License Plate detection
- Custom OCR was trained and used to predict each individual number from license plate

### **Real Time Face Recognition**

Open Source Contribution

Python, Tensorflow, Facenet, Keras

- This project was to detect and recognise faces in real time(in video)
- Apart from Traditional methods of face recognition, I have used embedding of two faces as measure to differentiate them
- Pretrained model from Facenet is retrained for my dataset
- I have taken video frame at x miliseconds
- After that, created embedding and compared with model for each frame

#### **Festival Recognition App**

Open Source Contribution

JAVA, TENSORFLOW, ANDROID

- This is an android app, which detects type of Indian Festival after taking image from Camera or gallery
- For this app I have collected thousands of images for Holi, Diwali, Eid, Birthday, Marriage
- Then I used Inception V4 model from ImageNet and retrained it on above dataset
- This retrained model is optimised for Android by rounding graph and making it compitable for android platform

## Hand written digits classification

JAVA, TENSORFLOW, ANDROID, KERAS

- This is an android app, which detects number drawn by user between
- I have used MNIST dataset for training two diffenet model with Tensorflow and Keras
- User can draw any digit and prediction from two models are given

#### **Cancer Survival Prediction**

CDAC Project

Open Source Contribution

2

- This was group project. My role was to develop & predict model for survival of patients
- Dataset was obtained from seer.cancer.org and it has various cancer types with patients data
- Hypothesis was if cancer is detected in early stage and at early age then chances of patients survival are more

## **Core Development Section**

## True Skin Tone Color

Mindstix Software Labs Project

Detection

PYTHON, OPENCV, IMAGE PROCESSING

Current Project

- Alogrithm development to get true skin color from image, independent illumination conditions
- Color diffrence delta E between photospectrometer and developed algorithm is < 2.38</li>

#### **Data Migration Scripts**

Mindstix Software Labs Project

PYTHON, LDAP, ORACLE DB

• Data Migration From Oracle DB to LDAP using Python

#### Orchestration Chef, Puppet, Ansible

Coriolis Tech Project

Rails, Mongo, Chef, Puppet, Ansible,

**REST API** 

- I was working as Team Lead and Lead Developer for this project
- Use case is client have certain products that need to be managed using configuration manager
- Using either Chef, Puppet or Ansible, we can perform job like install agent, register agent, upgrade agent etc

#### Soap client in C

Coriolis Tech Project

C, SOAP

I maintained & added new features

#### **REST API client in GO Lang**

Coriolis Tech Projectt

Go, REST CLIENT

· I developed this app, which is replacement of curl

### **Automate Instance Creation**

**AWS** 

Coriolis Tech Project

BASH, AWS CLI, AWS

Tool for migration of VMware vSphere OVA to AWS AMI

### **Rails Backend Development**

Coriolis Tech Project

RUBY, RAILS, MONGO, REST API

- It was dating app, just like tinder
- REST API implementation for various feature request

#### **Android Apps in Kotlin**

Open Source Contribution

KOTLIN, ANDROID

• Android Apps using Kotlin language
